

Scapa Double Sided and Transfer Tapes Range

Bonding Solutions for Industry

Your Global Partner

Scapa is a global manufacturer of a wide range of specialist adhesive tapes and foams, with world class production facilities in Europe, North America and Asia.

With advanced adhesive coating technology and custom converting capabilities, we have provided customers, from a range of diverse markets, with the innovative technical solutions that they require.

At Scapa, we consider ourselves a technical partner to our customers and are able to offer the benefit of experienced technical expertise in the manufacture of our extensive range of double sided and transfer tapes.

With all products manufactured in plants that adhere to strict quality guidelines and meet the exacting standards of ISO 9000 - 2000 we can ensure that our rigorous systems maintain consistent levels of quality and service to our customers.

Scapa double sided and transfer tapes are used in a variety of highly technical specialist applications including the following:

- Bonding of flexible printed circuits
- Demanding splicing applications
- Security bonding applications
- Nameplate bonding
- Fixing of sound dampening materials in extreme circumstances
- Profile bonding
- A full range of fixing and bonding applications in the assembly of mobile phones.

Whatever the requirement, we have the capability to design a product to meet your specialist needs.

Bonding Solutions for Industry

Scapa Double Sided and Transfer Tapes encompass a wide variety of pressure sensitive solutions that are designed to increase manufacturing efficiency by replacing traditional bonding and fastening materials.

Our Double Sided and Transfer Tapes provide durable, reliable and effective bonding, fixing and splicing of the following substrates:

- Paper
- Metal, aluminium
- Glass, ceramic
- Rubber
- Painted surfaces
- Textile, cotton
- UPVC, Soft PVC
- Polyethylene, Polypropylene
- ABS, Acrylate
- Polystyrene
- Polycarbonate

Our Double Sided and Transfer Tapes portfolio includes solvent and hot melt based adhesives, water and solvent based acrylic adhesives and high performance silicone based adhesive systems.

Typical applications of our range include:

- Fixing
- Attaching
- Bonding and Assembly
- Laminating
- Splicing
- Closing
- Temporary/Removable holding
- Die cuts to suit special needs

In addition to our comprehensive Double Sided and Transfer Tapes range, we also produce a complementary range of single sided filmic, cloth, foil and foam products, plus double sided foam and specialist tape solutions for niche market areas.

From standard products to custom-engineered solutions, Scapa's product portfolio will meet your most stringent requirements.

Whatever your specific application or new product development needs, please contact Scapa European Customer Care Team.

▲ This surface selection chart is a first step to select the appropriate adhesive group, depending on what substrates you want to bond. The next step is to narrow this selection down by considering your specific application requirements in relation to the different adhesive systems, level of tack, temperature resistance, shear performance and peel adhesion. This information is provided in the different inserts enclosed. Third step is to select the appropriate product from the remaining adhesive group(s).
